TO WHOM IT MAY CONCERN:

Recently, Dr. Rob Debease from Coweta Family Chiropractic Care presented a seminar concerning the effects of stress in the home and workplace to our church. Our church family found his presentation to be very helpful and informative. His personal style of delivery and openness to explain technical aspects of how the body responds to stress clearly communicated that he is not in the chiropractic profession just to make a living – he genuinely cares about people.

Since the seminar, several of our families have experienced improved health and quality of life through implementation of the exercises Dr. Rob suggested and through follow-up treatment through his office.

I highly recommend that you consider inviting Dr. Rob to come and speak to your church, school, club, organization, etc. After his visit, I think you will join me in recommending him to others.

Thanks again, Dr. Rob, for helping people to discover new hope and new methods in dealing with the physical stress of life.

Your friend,

C. Mark Boyd,  
Pastor
